

Dhruv Sharma

Software Developer

+91 97853 26798 | shrmadhruv11@gmail.com | Ajmer, Rajasthan | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

Profile

Software Developer with 3+ years building and scaling production AI systems end to end. Experience spanning agentic voice AI, LLM evaluation pipelines with OpenAI and Anthropic, and serverless architecture on AWS, alongside React and TypeScript frontends and Python backend services. Focused on making AI systems auditable, cost efficient, and reliable in production.

Skills

Languages	HTML, CSS, JavaScript, TypeScript, Python
Frontend	ReactJS, MUI, NextJS, Redux Toolkit, Zustand, React Query
Backend & Databases	FastAPI, MongoDB, SQL
DevOps & Cloud	Docker, AWS (Lambda, API Gateway, EC2, S3, CloudWatch, CodePipeline)
Tools	Git, Webpack

Experience

Team Geek Solutions

Jul 2023 – Present

Software Developer

Remote

- **Core engineer** in a 6 to 8 person team at an early stage AI recruitment product, owning architecture and feature design across **5 frontend applications** and **200+ AWS Lambda functions**.
- Architected a **provider agnostic agentic voice AI platform** automating **800+ weekly screening calls**, with vendor APIs, payloads, and webhooks driven by database config so new providers onboard with **zero code deploy**.
- Built an **LLM screening evaluator** on **OpenAI GPT 4o** converting call transcripts into **auditable hiring decisions** across a 7 field enforced schema, with verbatim citation grounding and guardrails blocking unsupported rejections.
- Built an **AI facial monitoring and integrity engine** pairing browser based eye and face tracking with 6 signal server side analysis and Anthropic Claude narration, lifting cheating detection accuracy from **70% to 91%** across **8,000+ evaluations**.
- Developed **containerized full stack coding environments** for frontend, backend with API questions with live test case validation, browser terminal and file explorer, automated teardown, cutting setup from **3 hours to 20 minutes** for **500+ candidates**.
- Automated the evaluation pipeline with **Anthropic Claude question generation** and OpenAI answer processing, plus sandboxed grading across **40+ languages**, eliminating **200+ manual hours monthly**.
- Redesigned the **AI resume screening pipeline**, benchmarking Anthropic Claude against OpenAI and Azure Document Intelligence to collapse **3 vendors and 5 model calls into 1 cached structured call**, cutting cost **54 to 75%** at 1,500 resumes monthly.
- Designed data driven dashboards with real time analytics and advanced filtering, plus a **UI component library used across 4 products**, reducing feature delivery time **30%**.

Team Geek Solutions

Jan 2023 – Jul 2023

Technical Intern

Remote

- Built end-to-end UIs using React, Material UI, and a **reusable component library of 20+ components**; managed application state with **Redux, RTK, and React Hooks** for predictable data flow.
- Developed and maintained a **micro-frontend architecture** using **Webpack Module Federation** across **3+ independent micro-frontends**, enabling independent deployments and team scalability.
- Designed **5+ serverless backend functions** with **AWS Lambda and API Gateway**, and gained hands-on experience with frontend-backend integration, debugging distributed systems, and optimizing API consumption.
- Collaborated with senior engineers on **production-grade system design**, focusing on performance, scalability, and real-time application best practices.

Samagra Foundation

Jun 2021 – Aug 2021

Web Development Intern

Remote

- Designed and structured an **Internship Portal** with **6+ front-end routes**, including admin panels, resume builder, chat system, and more.
- Implemented features such as job opening management, application filtering, and insights display.
- **Led a team of 5 interns** and oversaw front-end development using HTML, CSS, and JavaScript.

Projects

Fitmind AI [\[GitHub\]](#) [\[Live Demo\]](#)

Aug 2026

React, TS, MUI, Zustand, React Query, FastAPI, MongoDB, Gemini & Groq (LLM + Whisper)

- A voice-first fitness coach combining speech transcription, mood/energy analysis, and generative AI to produce daily-adaptive workout plans, real-time streaming chat coaching, and automated weekly recaps.

FakeBook – Social Media Application [\[GitHub\]](#)

Mar 2023

JavaScript, HTML, CSS, React, MUI, Node, Express, MongoDB

- Implemented secure user auth & friend management features, enabling easy connections & interactions through personalized profiles and timeline pages for sharing posts & engaging with likes/comments.

Education

IcfaiTech, The ICFAI University

Aug 2019 – May 2023

Bachelor of Technology - CSE

Jaipur, Rajasthan

- CGPA - 8.45/10
